Senior Software Engineer with 5+ years of experience in full-stack and frontend web application development. Specialized in modernizing enterprise architectures and building reliable, scalable systems utilizing React, TypeScript, C#/.NET, and SQL. Proven track record of combining workflow automation and intuitive UI/UX design to improve deployment efficiencies and user experiences.

PROFESSIONAL EXPERIENCE

01 / ORGANIZATION EVOLUTION

GTM SPORTSWEAR → CHAMPION TEAMWEAR → HANESBRANDS → UNRIVALED TEAMWEAR

Continuous employment through multiple acquisitions and ownership transitions.
Promoted through increasingly technical roles, from product systems and workflow automation into full-stack application development and senior application ownership.

Senior Application Developer

Nov 2024 — Present

Unrivald Teamwear · Enterprise Web Applications

- **Architecture & Payment Integration:** Architected and engineered the end-to-end integration of a new Adyen payment processor across 5 core enterprise applications, securing customer-facing and internal transactional workflows.
- **Legacy Modernization:** Modernized legacy .NET MVC systems by refactoring them into decoupled React and TypeScript architectures with modern .NET backend services, utilizing Vite frontends and Azure DevOps for robust CI/CD validation.
- **Checkout Optimization:** Led the full-stack refactor of the checkout workflow, fixing critical race conditions to eliminate duplicate payment transactions and ensure transactional integrity between frontend state and backend order creation.
- **System Scalability:** Redesigned the product customization matrix and state hydration modal for the enterprise sales order system, reducing server overhead and dynamically persisting cross-functional configuration profiles.
- **Performance Engineering:** Optimised data-fetching strategies and asset loading for core imagery services, significantly dropping redundant server requests to maximize client-side responsiveness.

Developer Applications III

Jun 2022 — Nov 2024

Hanesbrands Inc. · Application Development

- **Full-Stack Feature Engineering:** Pivoted into full-stack application development, engineering scalable features across frontend React interfaces and backend C# services for core enterprise web properties
- **UI/UX & Frontend Ownership:** Owned the end-to-end UI/UX design and frontend development of the mission-critical Sales Order Entry application, transforming complex business requirements and wireframes into highly responsive production features
- **Codebase Optimization:** Refactored major modules of the Sales Order Entry frontend to optimize code maintainability, simplify user workflows, and establish a modular design system for future updates
- **Workflow Automation Engine:** Engineered an automated customer-proof generation tool that automatically compiled artwork data and handled client-approval communications, completely removing manual dependencies on the Art Department

Research & Development Coordinator

May 2016 — Jun 2022

Champion Teamwear · Product + Process Innovation

- **System & Asset Migration:** Orchestrated the migration of enterprise image assets and web-to-print production pipelines from legacy Adobe Scene7 to the Pulse Graphics Engine before end-of-life
- **Workflow Automation Scripting:** Developed custom JavaScript automation scripts for Adobe Illustrator, accelerating art production delivery speeds by 75% while heavily reducing manual data processing errors
- **Data & Render Optimization:** Engineered parsing scripts to automatically identify and structure text, canvas styling, and colors for seamless entry into the core CMS, ensuring stable rendering across web customization experiences
- **Technical Upskilling:** Independently mastered TypeScript and SQL to support core software database needs, building utility scripts to improve data pipelines and internal infrastructure tools
- **Server Scripting:** Created robust PowerShell automation scripts to securely transfer large-scale asset profiles and file arrays during system migrations, eliminating manual overhead

Lead Technical Application Designer

Mar 2014 — May 2016

GTM Sportswear / Champion Teamwear · Product + Production Systems

- **Web-to-Print Engineering:** Formulated the product-preparation guidelines and configuration standards for publishing complex customizable apparel assets to web interfaces
- **CMS Pipeline Collaboration:** Partnered closely with backend engineering teams to design scalable URL parameter structures for dynamic asset configuration using Adobe Scene7
- **Cross-Functional System Launches:** Collaborated directly with web development and marketing teams to launch online product personalization initiatives, generating automated templates to optimize the web-to-print handoff
